Listening carefully allows Templer Interiors to find the best possible kitchen design for all its clients

In an ideal world, a kitchen designer would not be limited by restrictions imposed by awkward corners or a lack of space. Frequently, however, designers and homeowners have to work within the constraints of a space that may be small and not readily increased in size.

Susan Templer of Templer Interiors, who designs kitchens in the San Francisco area, says this is often the case.

"The kitchen featured here, designed for an avid cook, is a good example of this. The space for the new kitchen was small,

so we expanded the doorway and replaced it with pocket doors, which allowed for a longer island," she says.

"I always try to include three essential features in all my kitchens – high-tech organizers in the cabinets to maximize the storage, plenty of counter space, and a decorative focal point where the kitchen faces another room."

This page: Susan Templer of Templer Interiors designed this kitchen, complete with Shaker-style doors, to match the Arts and Crafts style of the house.

This kitchen includes all these, with the island providing ample counter space and seating for two. A special gourmet espresso corner enables the husband to make coffee and other drinks for guests.

Templer Interiors is an independent kitchen and bathroom design company, offering full project-management services, and guiding clients from design through product choice to completion.
